

REI Positions in the Southeast.

Reach is part of Care Fertility, a well-established fertility group based in the UK that is expanding its presence in the US.

Background on Care Fertility

Care has clinics in Europe and the US, along with:

- A founder who helped create IVF in the late 70's
- A network of 29 clinics in the United Kingdom, United States, Ireland, and Spain
- Approximately 75 doctors and 200 embryologists
- Proprietary, in-house AI Embryo Selection technology, developed from hundreds of thousands of imaged embryos
- A record of successful practice-building, based on the kind of genuine patient centricity that we believe is rare
- Renowned Group Medical Directors who provide support when needed
- A passion for innovation, R&D and collaboration
- A genuine, not fabricated, belief in work/life balance
- **Reach, a rapidly growing Charlotte practice that seeks additional doctors and offers a leadership opportunity.**

We don't think we can be all things to all people, so we are carving out a niche in the US, **starting in the Southeast**. Well-run practices, capable of growth with two to five great doctors whom we provide good pay, bonuses, and equity opportunity along with extensive support and the work/life balance that a sustainable practice needs.

We don't have all the answers, think no one does, so make it a point to actively learn and share from the practices we acquire (11 overseas and 4 in the US either recently acquired or in process).

We are also grateful, because though it's not easy, we've been incredibly successful for 27 years now, largely based on a simple recipe:

- Attract more patients
- Provide good value
- Support and aid doctors and clinics effectively
- Deliver better outcomes

More importantly, Care knows that everyone's situation is different and does not have a one-size-fits-all approach. Instead, we want to listen, hear what others are looking for and see if there is a fit with what we're building, starting with **North Carolina, Tennessee, and Georgia**, but expanding.

We'd love to hear from you!
